

# Face in Space

---

Congratulations!

This certifies that the face of Jyll Stuart has flown in space aboard the Space Shuttle Discovery on mission STS-133 from February 24 - March 9, 2011. The face was flown on Discovery's mission to the International Space Station at an altitude of 220 miles above the Earth. It flew at a speed of more than 17,400 miles per hour as it orbited our planet. On behalf of my crew and all of NASA, we thank you for sharing the excitement of our mission and welcome your interest in space exploration. We were glad to have you aboard.
